

**ABC-Amega Enhances It's Industry Group Credit Reporting  
with the Addition of Statistical Scoring from PredictiveMetrics<sup>SM</sup>**

*New Trade Reports with PredictiveMetrics' Net30Score<sup>SM</sup> Yields More Relevant Information  
for Credit Decision Making and Portfolio Credit and Collection Management*

**Buffalo, NY** – ABC-Amega, Inc., a global leader in the commercial collection, credit information, and receivables outsourcing markets, has partnered with PredictiveMetrics<sup>SM</sup> Inc. (PMI), a global leader of statistical scoring solutions for the B2B market to provide ABC-Amega's credit group members with an industry-relevant, statistically based analysis of receiving payment in a timely manner and reporting on their customers.

*The ABC-Amega Net30Score Report* integrates PredictiveMetrics' state-of-the-art statistical scoring technology with ABC-Amega's proprietary credit interchange system, *goAmega*. The resulting scoring analysis based on payment trends within each credit group's historical customer payment database provides the group members the most advanced risk assessment available for small and mid-sized customers.

"Developing a predictive payment score from member-provided payment data makes it particularly relevant to the industry the various credit groups do business in," said David Herer, CEO of ABC-Amega. "Using PMI's Net30Score in conjunction with the detailed aging information currently available to our members will give members added value through the addition of a statistically validated score that will help them make more accurate and profitable credit and collection decisions."

The ABC-Amega Net30Score Report is designed to allow credit group members to proactively monitor their customers' creditworthiness in an ever-changing financial environment. Net30Score looks at every customer in the goAmega database each month and predicts the specific probability that an existing GOOD paying company is going to become a delinquent or BAD paying company in the future. ABC-Amega credit group members now have access to the most predictive analysis on both their new and existing customers, which is based on their group's specific payment data.

The Gift Associates Interchange Network (GAIN) will be the first of ABC-Amega's industry credit groups to be introduced to *ABC-Amega Net30Score Report* when the product is launched at the group's conference in Chicago, May 12-14, 2010. It will be rolled out to other ABC-Amega credit groups following the GAIN launch.

**About ABC-Amega Inc.**

Established in 1929 as American Bureau of Collections, a commercial collection company, ABC-Amega has grown from a one-man operation into a worldwide, world-class receivable management firm servicing thousands of small and medium-sized businesses, as well as many of the "Fortune 500" and multinational corporations.

ABC-Amega has been managing credit groups since 1965. Our credit groups save members time and money by providing accurate, relevant credit information that helps them make informed credit decisions quickly and easily.
