

## Seamlessly integrating predictive scoring for use with SAP® solutions

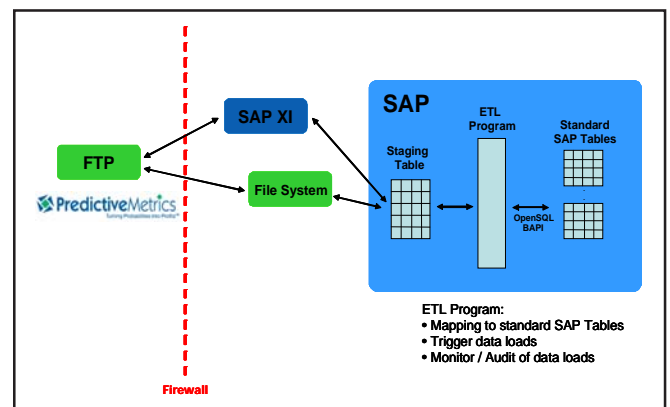

PredictiveMetrics' (PMI) AccessLink<sup>SM</sup> progressive data integration technology between AccessLink and SAP NetWeaver Process Integration technology helps customers easily extract the data necessary to take advantage of PredictiveMetrics' industry- and finance-specific and custom behavior scores for more active decisioning.

### AccessLink Benefits

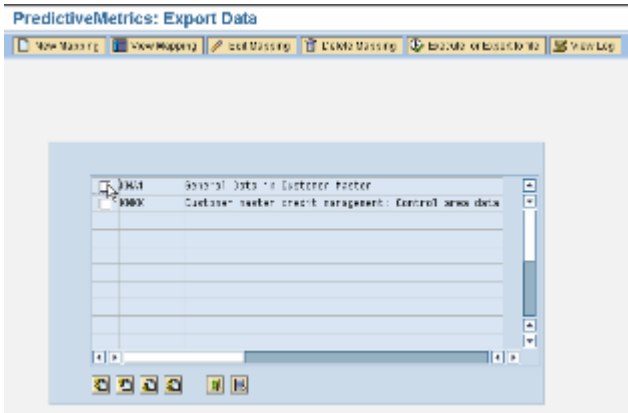

- ◆ You can have PredictiveMetrics conduct a FREE retrospective validation analysis (back test) on your portfolio, based on your bad definition using your internal performance data to prove how well our scores work on your customers, prior to purchase
- ◆ Ability to score accounts specific to your industry or type of financing by having access to our Net30Score<sup>SM</sup> for commercial trade credit, UtilityScore<sup>SM</sup> for Collections, LeaseRiskScore<sup>SM</sup>, or have a custom behavior model developed to meet your objectives
- ◆ Our scoring output can be turned into business intelligence for credit and collections or CFO use
- ◆ By actively monitoring your portfolio with our scores you can better prioritize collections, conduct credit line management, and authorize repeat credit decisions
- ◆ Leverage the predictive power of your internal performance data, which is now easily accessible and it's Free, to score and decision all accounts; no bureau data required to produce accurate scores
- ◆ Minimize IT resources in deploying this new interface functionality that is SAP certified

### AccessLink Features

PMI AccessLink v1.0 has been certified as Powered by SAP NetWeaver® for use with SAP® solutions. The SAP Integration and Certification Center has certified that PredictiveMetrics' AccessLink v1.0 properly integrates with SAP NetWeaver PI to exchange critical data with instances of SAP Business Suite software. This was certified via the interface scenario NW-XI-CNT 7.0. By now having the ability to easily pull the essential data to score your portfolio, you can reduce losses, lower operating expenses and better allocate resources.
