

Score MinerSM 3.0

Driving better decisions by actively monitoring customers

PredictiveMetrics' ScoreMinerSM web-based report and query system offers users the functionality to observe how the credit and collection risk of their accounts are changing over time. Businesses can assess the impact of their risk strategies on their entire portfolio, important segments, or on individual accounts to turn data into business intelligence.

ScoreMiner 3.0 Benefits

- ◆ No software to implement; minimal IT resources - It's a web-hosted querying and reporting system
- ◆ Evaluate an entire portfolio, a subset or break it down into individual accounts
- ◆ Filtering and reporting capabilities to review and analyze information to group accounts based on the credit and collection professional's criteria for implementing strategies
- ◆ Know the number of accounts within each risk group (Extreme, Very High, High, Moderate, Low and Very Low)
- ◆ Within each risk group, know statistically the credit/collection risk rate and how this changes over time
- ◆ Determine how every analyst, collector, or sales personnel's accounts are doing relative to their peers and risk level
- ◆ Reduce losses and lower DSO by creating a custom watch list based upon your query

ScoreMiner 3.0 Features

ScoreMiner 3.0, web based credit and collection scoring, data mining, query and report system leverages the predictive power of PredictiveMetrics' industry/finance specific and custom score and groups the data for you to develop performance based strategies. All reports are exportable to Adobe Acrobat (PDF) and account lists are now exportable to Excel, text file and CSV. ScoreMiner 3.0 boasts much faster turnaround time for reports; particularly for companies with a larger number of accounts.

Advanced Features Include:

- ◆ Watch trends in credit and collection risk over time
- ◆ Evaluate amount of dollars at risk of charge-off
- ◆ Produce reports for Sarbanes-Oxley audits
- ◆ Download the accounts you need based on credit and collection risk, when you need it!
